

**FOR IMMEDIATE RELEASE**

**SimFlight3D launches '58 C172 for Flight Simulator X, complete with detailed virtual cockpit and 2D panel**

*Now available in four paint schemes*

**April 24, 2009**—SimFlight3D launches its first model, the '58 C172 (straight tail) for Flight Simulator X, complete with real manual flaps, fully operational cockpit and panels. Other features include: chart for map screen use, mike button for ATC window, animated pilot, oil check door and dipstick.

With over 15 years of 3D modeling, graphic design/conceptualization and animation in the video game industry plus actual flying experience, SimFlight3D was created to promote sophisticated, accurate aircraft models.
